

Job Matching & complementary support services for refugees and employers

Refugee Employment Platforms can serve as the **central hub** for refugees and asylum seekers to find **decent work**, and for businesses seeking information on refugee hiring and creating conditions for sustainable refugee employment.

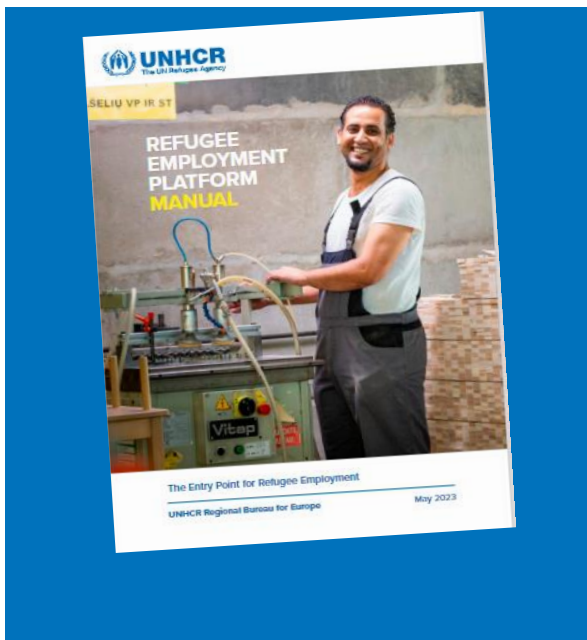

Refugee Employment Platforms offer **tools, information, and support services** for refugees and employers, along with effective **job matching to better link national labor supply and demand**.

By **bringing together employers, NGOs and relevant stakeholders offering socioeconomic inclusion support**, platforms will be optimized and serve as the main outlet for connecting businesses with refugee talent.

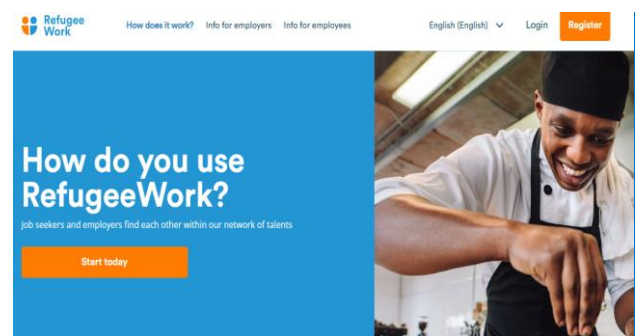

REFUGEE EMPLOYMENT PLATFORM

The Refugee Employment Platform (REP) is a digital tool that serves as entry point to enhance decent work prospects for refugees of all nationalities throughout Europe and connects companies with refugee job seekers. Its functions streamline the job placement process itself, while simultaneously linking refugees, employers and integration actors with employment support, skills training, and wraparound services essential to maximizing job prospects, preparing refugees for the labor market in their host countries, and supporting companies to create sustainable employment.

REFUGEE WORK

RefugeeWork is the Refugee Employment Platform in The Netherlands. By matching refugees and asylum seekers with open vacancies, the platform aims to mitigate the gap between employment seeking refugees and asylum seekers, and the shortages in the Dutch labor market. In the long term, the platform aims to become the national ecosystem for all newcomers to find meaningful work. Besides providing job matches, the platform offers information and support for job seekers and employers. Working together with municipalities, companies, reception authorities (COA) and other relevant stakeholders will further enhance the platforms outreach and value. If you are interested in contributing to its optimization, please do reach out!
